

BEST SPARK INNOVATION (BSI)
BEST I - Ultra Power Ignition Leads
The Ultimate Spark Ever - Stronger Spark Energy & Faster Electric Transmission

TM

BEST I Cable widening the window of engine design for automobile engineers to fulfill the future trend requirement of the automobile industry:

BEST I Cable is flexible, light weight, twisted still perform, and there is no significant difference in ignition spark energy and electric transmission speed between cables of long and short length, untwisted and twisted.

- 1) As a direct replacement of the conventional ignition cable and without adjusting any ignition parameters, **BEST I Cables improves fuel economy and enhance engine performance.**
- 2) Automobile engineer can tune the engine with adjusting the ignition parameters according to the properties of BEST I Cable will further maximize its performance benefits (see Success Stories).

BEST I Cable facilitates to develop engine design of three different categories with the focus of :

- a) **Fuel Economy**
- b) **Vehicle Power and**
- c) **Optimization of fuel economy and vehicle power**

BEST SPARK INNOVATION (BSI)
BEST I - Ultra Power Ignition Leads
The Ultimate Spark Ever - Stronger Spark Energy & Faster Electric Transmission

Foreseeing Future Trend of Automobile Industry:

With focus on **Long-term Environmental Friendly**:-

- 1) Electric driven automobile
- 2) A long-term environmental friendly ignition system of an internal combustion engine: that in favor of **BEST I Cable**
- 3) Combined features of 1) and 2)
